

Subject Index of Papers Published in Volume 87 of the *Journal of Dairy Science*

A

- absorption, cow, magnesium, potassium, 379
acetone, genetic evaluation, ketosis, 1108
acid-base balance, phosphorus excretion, cation-anion difference, dairy cattle, 1751
acid-base status, dairy cow, meta-analysis, dietary cation-anion difference, 2222
acidifying activity, urea, lactic acid bacteria, *Streptococcus thermophilus*, 550
 urease, spontaneous mutation, *Streptococcus thermophilus*, 1634
acivicin, gamma-glutamyl transpeptidase, isolated ovine mammary acini, milk protein, 321
across-country genetic correlation, genetic evaluation, functional trait, variance heterogeneity, 2641
acute puerperal metritis, prostaglandin F_{2α}, fertility, uterine involution, 3238
acute-phase response, retinoic acid, peripartum period, *Escherichia coli* mastitis, 980
acyl-estrone, dairy product, milk, estrone, 2331
adaptive capacity, milk production, metabolism, hypothalamo-pituitary-adrenocortical function, 2094
additional feeding, dairy cow, carcass characteristic, antibiotic, 1558
adenovirus, lyostaphin, mastitis, antibody, 602
adipose, body condition score, genotype, lactation, 988
adjunct culture, volatile free fatty acids, 3224
adrenocorticotrophic hormone administration, cortisol, plasma, saliva, 1713
adsorption, emulsion, interfacial rheology, milk protein, 2769
aerobic stability, high moisture corn, barley silage, propionic acid, 1310
 inoculant, molasses, *Lactobacillus buchneri*, 3407
 lactic acid bacteria, silage, total mixed ration, 2563
age at first calving, milk production, reproduction, heifer, 2730
 milk yield trait, lifetime, productive life, 2130
agitation time, milk sampling, creaming, 2846
alfalfa, particle length, tallow, milk fat, 652
alfalfa silage, dried molasses, liquid molasses, total sugar, 2997
alkylphenol, cheese whey, flavor concentrate, 4001
amino acid, dairy cow, glucose infusion, mammary metabolism, 340
 peptide, dairy cow, flaked corn, 413
 portal-drained viscera, model, 4247
 requirement, lactation, efficiency, 1279
 rumen bacteria, fiber, particle size, 1413
 splanchnic tissue, mammary gland, cow, 3461
 steam-flaked corn, digestibility, supplemental lysine, 399
amino acid degradability, monensin, zinc, 2571
amino acid flow, dairy cow, grain processing, forage particle length, 2578
amino acid transporters, mammary gland, lactation, porcine, 3235
ammonia emission, nitrogen excretion, steam-flaked corn, 2546
amphipathic peptide, bovine milk, component-3 of proteose peptone, antimicrobial action, 1621
analytical method, milk fat, fatty acids, lipid, 3785
angiotensin-I-converting enzyme, *Aspergillus oryzae*, casein hydrolysate, antihypertensive peptide, 3183
 hypertension, lactokinin, whey protein, 3845
 whey, antihypertensive peptide, 1967
animal health, economics, reproductive disorder, epidemiology, 212
animal plasma, calf milk replacer, immunoglobulin G, colostrum replacement, 1806
anionic salts, chloride, sulfate, milk fever, 1245
antibiotic, additional feeding, dairy cow, carcass characteristic, 1558
 antimicrobial, organic, management, 191
 economics, milk yield, clinical mastitis, 2702
antibiotic residue, screening test, somatic cell count, ewe milk, 3132
antibody, adenovirus, lyostaphin, mastitis, 602
antibody response, cross reactivity, J5 *Escherichia coli*, hyperimmunization, 3375
anti-*H. pylori* urease egg yolk immunoglobulin, drinking yogurt, passive immunity, *Helicobacter pylori* infection, 4073
antihypertensive peptide, angiotensin-I-converting enzyme, whey, 1967
 Aspergillus oryzae, casein hydrolysate, 3183
antimicrobial, organic, management, antibiotic, 191
antimicrobial action, amphipathic peptide, bovine milk, component-3 of proteose peptone, 1621
antimicrobial activity, antioxidative activity, lactobacilli, probiotic cheese, 2017
antimicrobial drug resistance, *Staphylococcus aureus*, milk, Kenya, 4145
antimicrobial resistance, mastitis, prevalence, bacteria, 2433

- antioxidative activity, lactobacilli, probiotic cheese, antimicrobial activity, 2017
- apolipoprotein B, apolipoprotein E, mRNA, liver, 2881
- apolipoprotein E, mRNA, liver, apolipoprotein B, 2881
- apoptosis, granulocyte-macrophage colony stimulating factor, signal transducer/activator of transcription, mastitis, 4104
- aroma, Osme, pyrazine, sweet whey powder, 4057
- pasture, Ragusano cheese, 816
- artificial insemination, fertility cost, profit, 3053
- multiple semen straws, elapsed time, 972
- artificial insemination bull, evaluation stability, genetics, 2614
- artisanal cheese, rennet paste, pregastric esterase, 1132
- ascorbic acid, vitamin C, mastitis, 32
- Aspergillus oryzae*, casein hydrolysate, antihypertensive peptide, angiotensin-I-converting enzyme, 3183
- Assaf, dairy sheep, lamb production, seasonality, 3690
- attenuated total reflectance, Fourier transform infrared spectroscopy, raw milk, mid-infrared, 2779
- automatic concentrate feeder, milk production, pelleted soy hulls, barley pellets, 3808
- automatic milking, grazing, behavior, milk production, 1702
- milk production, somatic cell score, genotype by environment interaction, 1487
- oxytocin, milk ejection, milking characteristic, 4163
- autoregression, dairy cattle, prediction of test-day record, test-day model, 2591
- avidity, lactoferrin, phage display, iron binding, 3247
- B**
- bacteria, antimicrobial resistance, mastitis, prevalence, 2433
- bacterial count, calf bedding material, growth performance, health, 3736
- milk quality, bulk tank milk, somatic cell, 3561
- sawdust, sand, teat end, 1694
- bacterin, capsule, serotype, *Staphylococcus aureus*, 178
- barley pellets, automatic concentrate feeder, milk production, pelleted soy hulls, 3808
- barley silage, digestibility, milk production, mechanically processed forage, 4170
- physically effective neutral detergent fiber, dairy cow, chop length, 2987
- propionic acid, aerobic stability, high moisture corn, 1310
- Bayesian method, clinical mastitis, genetic evaluation, multivariate threshold model, 3038
- bedding, preference, behavior, freestall, 2889
- behavior, dairy cattle, flooring surface, 1203
- freestall, bedding, preference, 2889
- housing, dairy cattle, 1208
- legume, grazing, dairy cow, 1317
- milk production, automatic milking, grazing, 1702
- bi-crop, cereal-legume, rumen function, pea-wheat, 3398
- Bifidobacterium*, bile salt hydrolase, purification, 258
- bile salt hydrolase, purification, *Bifidobacterium*, 258
- bioactivity, β -casein phosphopeptide, dimer, eukaryotic expression, 3198
- bioavailability, calcium, zinc, iron, 3629
- cattle, zinc, proteinate, 1085
- biochemical composition, cheese, biofilm color, spectrophotometry, 1536
- biofilm color, spectro-colorimetry, biochemical composition, cheese, 1536
- biohydrogenation, calcium salt, fatty acyl amide, omasal sample, 1038
- conjugated linoleic acid, continuous culture, 3473
- docosahexaenoic acid, eicosapentaenoic acid, 645
- linseed oil, digestion, *trans* fatty acid, 2472
- biomechanics, trimming, claw disorder, lameness, 1732
- biotin, bovine claw, white line disease, mechanical strength, 2874
- bite mass, rumen fill, grazing behavior, intake rate, 3417
- blue cheese, dextran, enzyme, *Penicillium roquefort*, 1627
- body composition, somatotropin, dairy heifer, skeletal growth, 3869
- body condition change, random regression, fertility index, body condition score, 2669
- body condition score, body condition change, random regression, fertility index, 2669
- dairy cow, 3076
- dairy form, disease, 3526
- fertility, 3534
- random regression, 717
- genotype, lactation, adipose, 988
- periparturient cow, grouping, 517
- bone marrow, myelopoiesis, steroid hormone, retinoic acid, 1188
- bone marrow cell, polymorphonuclear neutrophilic leukocyte, L-selectin, chemotaxis, 3350
- bone mineral content, radiographic photometry, dual-energy x-ray absorptiometry, 3816
- borderless evaluation, multiple-trait across-country evaluation, simulation, 2709
- borderless model, genotype by environment interaction, international sire evaluation, 2599
- bovine, endometrial cell, interferon- τ , prostaglandin, 2032
- laminitis, lameness, oligofructose, 2932
- Streptococcus uberis*, pulsed-field gel electrophoresis, mastitis, 2062

- bovine claw, white line disease, mechanical strength, biotin, 2874
- bovine growth hormone-releasing hormone, hormone, milk yield, Japanese Black cow, 1684
- bovine hoof, nutrition, keratin protein, laminitis, 797
- bovine mammary gland, leptin, prolactin, fat synthesis, 2941
- bovine mastitis, milk loss, daily milk, statistical model, 2073
- bovine milk, component-3 of proteose peptone, antimicrobial action, amphipathic peptide, 1621
- bovine oocyte maturation, retinol, heat stress, reproduction, 2449
- bovine somatotropin, continuous lactation, shortened dry period, 3746
- endometrium, pregnancy, 3268
- growth hormone, insulin-like growth factor-I, 2024
- insulin-like growth factor system, pregnancy, 3256
- lactation, milk yield, dry matter intake, 948
- reproduction, timed artificial insemination, dairy cow, 868
- bovine tuberculosis, dairy cow, lactation, nutrition, 330
- breeding scheme, genetic comparison, dairy cattle, 1496
- breeding value, dairy cattle, leptin polymorphism, milk traits, 3925
- brine temperature, early gas, coliform, presalting, 3648
- brown midrib, corn silage, mechanical processing, 2519
- forage sorghum, milk production, digestibility, 637
- buffer, conjugated linoleic acid, restricted intake, 4278
- bulk tank agitation, sampling, standards, 3099
- bulk tank milk, hygiene, psychrotrophic bacteria, mastitis, 1151
- somatic cell, bacterial count, milk quality, 3561
- total bacterial count, *Streptococcus uberis*, growth, 813
- bulk tank somatic cell count, goat, mastitis, mycoplasma, 3165
- bull selection, cow fertility, milk progesterone, first luteal activity, 3953
- buttermilk, emulsion, caseins, milk fat globule membrane, 4080
- fractionation, microfiltration, 267
- butyrate, ketone, rumen, 2486
- byproduct, wet corn gluten feed, soybean hull, corn steep liquor, 3899
- C**
- Caco-2 cell, dairy yeast, probiotics, 4050
- calcium, colloidal calcium phosphate, milk salts, cheese functionality, 854
- Mozzarella cheese, microstructure, confocal laser scanning microscopy, 1975
- zinc, iron, bioavailability, 3629
- calcium fortification, heat stability, skim milk powder, 1177
- calcium lactate, crystallization, Cheddar cheese, solubility, 863
- liquid expulsion, starter culture, Cheddar cheese, 574
- calcium salt, fatty acyl amide, omasal sample, biohydrogenation, 1038
- calf, colostrum replacer, immunoglobulin G, 106
- colostrum substitute, trypsin inhibitor, egg milk replacer, 1739
- competition, teat feeding, feeding behavior, 4190
- feeding method, feeding behavior, social behavior, 3428
- forage, particle size, rumen development, 2554
- grass, group size, isolation, 1380
- heifer, experiment, review, 3577
- yeast culture, rumen development, 1832
- calf bedding material, growth performance, health, bacterial count, 3736
- calf milk replacer, immunoglobulin G, colostrum replacement, animal plasma, 1806
- calf size, genetic trend, stillbirth, calving ease, 1477
- calpastatin, muscle, lactation, diet, 1428
- calving age, genetics, environment, interaction, 2455
- calving ease, calf size, genetic trend, stillbirth, 1477
- camel milk, lactating mammary gland, peptidoglycan recognition protein, 2660
- capability index, statistical process control, dairy farm, udder health control, 2459
- capillary zone electrophoresis, milk mixture, Halloumi cheese, 1595
- capsule, serotype, *Staphylococcus aureus*, bacterin, 178
- carbohydrate, high performance liquid chromatography, glycomacropeptide, whey protein isolate, 174
- mathematical model, fermentation rate, prediction equation, 1455
- carbon dioxide, Cheddar, cheese, yield, 3581
- proteolysis, Cheddar cheese, 3590
- salt addition, colloidal calcium phosphate, rennet gelation, 3209
- carbon dioxide hydrolysis, carbonic acid, lactose hydrolysis, ethanol fermentation, 1608
- carbonic acid, lactose hydrolysis, ethanol fermentation, carbon dioxide hydrolysis, 1608
- carcass characteristic, antibiotic, additional feeding, dairy cow, 1558
- α_{s1} -casein, milk-clotting enzyme, hard-cooked cheese, proteolysis, 565
- β -casein, tertiary structure, mass spectrometry, milk protein, 3638
- β -casein phosphopeptide, dimer, eukaryotic expression, bioactivity, 3198
- casein, cattle, haplotype, 4311

- genetic polymorphism, single-strand conformational polymorphism, sheep, 2606
- milk fat globule membrane, buttermilk, emulsion, 4080
- soy protein isolate, fat digestion, veal calf, 1051
- casein hydrolysate, antihypertensive peptide, angiotensin-I-converting enzyme, *Aspergillus oryzae*, 3183
- casein micelle, whey protein, structure analysis, confocal laser scanning microscopy, 1167
- caseinomacropptide, whey protein concentrate, cheese whey, gel strength, 831
- cation-anion difference, dairy cattle, acid-base balance, phosphorus excretion, 1751
- cattle, fine mapping, linkage disequilibrium, milk, 690
- haplotype, casein, 4311
- heritability, paratuberculosis, ELISA, 2108
- zinc, proteinate, bioavailability, 1085
- cattle breed, heat shock, embryo, 53
- cattle microsatellite, genome scan, quantitative trait locus, daughter design, 476
- ceftiofur, extended therapy, mastitis, *Streptococcus uberis*, 2393, 3322
- cell wall digestibility, lignin, corn silage, intake, 1439
- cereal-legume, rumen function, pea-wheat, bi-crop, 3398
- change point, lag, nonlinear, segmented, 169
- Cheddar, cheese, yield, carbon dioxide, 3581
- Cheddar cheese, calcium lactate, liquid expulsion, starter culture, 574
- carbon dioxide, proteolysis, 3590
- cheese flavor, nutty flavor, Strecker aldehyde, 1999
- fat removal, reduced fat, 841
- high-pressure processing, microstructure, shredability, 3172
- homogenization, salt retention, 2831
- solubility, calcium lactate, crystallization, 863
- ultrafiltration, condensing, 4004
- Cheddar ripening, *Lactobacillus delbrueckii* subsp. *bulgaricus*, nisin Z, proteolytic activity, 1585
- cheese, biofilm color, spectro-colorimetry, biochemical composition, 1536
- sensory, color, pasture, 308
- yield, carbon dioxide, Cheddar, 3581
- cheese flavor, flavor, sensory analysis, flavor chemistry, 777
- nutty flavor, Strecker aldehyde, Cheddar cheese, 1999
- sensory analysis, descriptive analysis, preference mapping, 11
- cheese functionality, calcium, colloidal calcium phosphate, milk salts, 854
- cheese whey, flavor concentrate, alkylphenol, 4001
- gel strength, caseinomacropptide, whey protein concentrate, 831
- cheese yield, rennet coagulation, Parmesan cheese, ultrafiltration, 2789
- chemometrics, Ragusano cheese, peptide, free amino acid, 3138
- chemotaxis, bone marrow cell, polymorphonuclear neutrophilic leukocyte, L-selectin, 3350
- chloride, sulfate, milk fever, anionic salts, 1245
- chocolate, milk fat, rheological property, milk powder, 20
- choice, dairy cow, ruminal acidosis, water, 2248
- cholesterol, vitamin D₂, crystal structure, β -lactoglobulin, 785
- chop length, barley silage, physically effective neutral detergent fiber, dairy cow, 2987
- hybrid, intake, whole-plant corn silage, 1298
- chromium, intensive grazing, dairy cattle, 4269,
- cisternal milk, ultrasonography, dairy cow, milk backflush, 2409
- cisternal recoil, goat, ultrasonography, milking frequency, 1181
- claw disorder, lameness, biomechanics, trimming, 1732
- claw hardness, claw water content, lameness, claw lesion, 2085
- claw lesion, claw hardness, claw water content, lameness, 2085
- claw water content, lameness, claw lesion, claw hardness, 2085
- clinical investigation, udder characteristics, udder health, principal components analysis, 1217
- clinical mastitis, antibiotics, economics, milk yield, 2702
- frequent milk-out, treatment, mastitis cure, 583
- genetic evaluation, multivariate threshold model, Bayesian method, 3038
- health trait, dairy cattle, quantitative trait loci, 2653
- somatic cell count, dairy cattle, genetic correlation, 3515
- pattern, lactation curve, 95
- clone, embryo splitting, nuclear transfer, yield performance, 729
- cluster analysis, milk yield, genotype by environment, dairy cattle, 2687
- coagulant, firmness, meltability, proteolysis, 274
- coconut oil, liver, microsomal triacylglycerol transfer protein, small intestine, 3858
- coliform, milk, *Salmonella*, *Listeria monocytogenes*, 2822
- presalting, brine temperature, early gas, 3648
- colloidal calcium phosphate, milk salts, cheese functionality, calcium, 854
- rennet gelation, carbon dioxide, salt addition, 3209
- colonization potentiality, single-strand conformational polymorphism, red-smear soft cheese, smearing inoculum, 3189

- color, ewe cheese, ripening, texture profile analysis, 249
 pasture, cheese, sensory, 308
- colostrum, preterm calf, intestine, nutrition, 1786
- colostrum replacement, animal plasma, calf milk replacer, immunoglobulin G, 1806
- colostrum replacer, immunoglobulin G, calf, 106
- colostrum substitute, trypsin inhibitor, egg milk replacer, calf, 1739
- colyophilization, β -lactoglobulin, storage, lactose crystallization, 1158
- competition, teat feeding, feeding behavior, calf, 4190
- component-3 of proteose peptone, antimicrobial action, amphipathic peptide, bovine milk, 1621
- compressibility, hardness, cow preference, freestall base, 3080
- concentrate supplementation, grazing, stocking rate, pasture allowance, 2902
- concentration factor, proteolysis, Mozzarella cheese, microfiltration, 3601
- conception rate, injectable, trace mineral, 3665
- condensing, Cheddar cheese, ultrafiltration, 4004
- confinement, factor analysis, discriminant analysis, grazing, 2748
- confocal laser scanning microscopy, calcium, Mozzarella cheese, microstructure, 1975
 casein micelle, whey protein, structure analysis, 1167
- conjugated linoleic acid, continuous culture, biohydrogenation, 3473
 Δ^9 -desaturase, milk fat, pasture, 369
 hepatic metabolism, monolayer culture, 67
 lactating cow, *trans* fatty acids, 3836
 milk fat, lactation, cow, 1196
 transition period, dairy cow, 1886
 variation, Nordic countries, 2800
- milk fat depression, rumen-protected supplement, cow, 3010
 restricted intake, buffer, 4278
 stearoyl-CoA desaturase, transgenic, milk fat, 3510
trans fatty acid, periparturient, dairy cow, 158
 vaccenic acid, milk fatty acids, 1758
- continuous culture, biohydrogenation, conjugated linoleic acid, 3473
 methane production, stoichiometric equation, microbial energetics, 112
 ruminal fermentation, sucrose, 4221
- continuous lactation, shortened dry period, bovine somatotropin, 3746
- copper, zinc, *Staphylococcus aureus*, mastitis, 976
- corn, particle size, digestion, starch, 1389
- corn processing, neonatal dairy calves, Holstein, 3439
- corn silage, milk yield, nutrient digestibility, 2172
 fermentation, laboratory silo, 4238
 intake, cell wall digestibility, lignin, 1439
 mechanical processing, brown midrib, 2519
- corn silage vs. soy hulls, dairy cow, feeding behavior, roughage neutral detergent fiber, 2230
- corn steep liquor, byproduct, wet corn gluten feed, soybean hull, 3899
- correlation, power analysis, rumen tissue sampling, papillae, 1336
- cortisol, plasma, saliva, adrenocorticotrophic hormone administration, 1713
- Corynebacterium bovis*, identification, endonuclease restriction analysis, 16S rRNA gene, 38
- cost per extra day open, replacement, economic model, retention pay-off, 2146
- cottonseed, genetically modified, performance, dairy cow, 1778
 mechanically delinted, dairy cow, 131
- cottonseed meal, dairy cow, gossypol, whole cottonseed, 2506
- covariance structure, test-day yield, heterogeneity of variance, 1908
- cow, amino acid, splanchnic tissue, mammary gland, 3461
 conjugated linoleic acid, milk fat, lactation, 1196
 milk fat depression, rumen-protected supplement, 3010
- lameness, ovarian activity, 4123
 magnesium, potassium, absorption, 379
 oxytocin treatment, milk ejection, 1236
 sheep and goat milk, 12S rRNA gene, polymerase chain reaction
 visceral organ, lactation, dairy, 2977
- cow fertility, milk progesterone, first luteal activity, bull selection, 3953
- cow preference, freestall base, compressibility, hardness, 3080
- cream cheese, grittiness, 2854
- creaming, agitation time, milk sampling, 2846
- cross reactivity, *J5 Escherichia coli*, hyperimmunization, antibody response, 3375
- crystal structure, β -lactoglobulin, cholesterol, vitamin D₂, 785
- crystallization, Cheddar cheese, solubility, calcium lactate, 863
- culling, survival analysis, time-dependent covariates, lameness, 4115
- culture, slaughterhouse, paratuberculosis, prevalence, 3770
- cutoff, sensory failure, shelf life, dulce de leche, 1601
 CXCR2, interleukin-8 receptor, mastitis, single nucleotide polymorphism, 2442
- cyst, synchronized estrus, ovulation, 3658

D

- daily milk, statistical model, bovine mastitis, milk loss, 2073

- dairy, cow, visceral organ, lactation, 2977
 Johne's Disease, *Mycobacterium paratuberculosis*, environment, 2959
 male and female fertility, longitudinal binary data, 3947
- dairy cattle, acid-base balance, phosphorus excretion, cation-anion difference, 1751
 behavior, freestall, housing, 1208
 breeding scheme, genetic comparison, 1496
 chromium, intensive grazing, 4269
 cluster analysis, milk yield, genotype by environment, 2687
 dairy conformation, quantitative trait locus, 450, DGAT1, multiple allele, quantitative trait locus, 431
 electrical conductivity, mastitis, random regression model, 1917
 feeding level, energy concentration, evaluation, 1425
 flooring surface, behavior, 1203
 food safety, meat quality, 183
 genetic correlation, clinical mastitis, somatic cell count, 3515
 heritability, health, 3062
 genome scan, multiple trait, quantitative trait locus, 3550
 induced lactation, somatotropin, economics, 3290
 integer programming, semen selection, optimization, 3542
 Israeli Holstein, paternity error, DNA microsatellite, 2627
 leptin polymorphism, milk traits, breeding value, 3925
 leukocytes, dexamethasone, heritability, 3928
 leevity, survival analysis, proportional hazard, 1469
 Neospora caninum, genetic susceptibility, 3967
 prediction of test-day record, test-day model, autoregression, 2591
 quantitative trait loci, clinical mastitis, health trait, 2653
 random regression, herd curve, test-day production, 2693
- dairy conformation, quantitative trait locus, dairy cattle, 450
- dairy cow, behavior, legume, grazing, 1317
 body condition score, 3076
 bovine somatotropin, reproduction, timed artificial insemination, 868
 carcass characteristic, antibiotic, additional feeding, 1558
 chop length, barley silage, physically effective neutral detergent fiber, 2987
 conjugated linoleic acid, milk fat, transition period, 1886
 trans fatty acid, periparturient, 158
 cottonseed, genetically modified, performance, 1778
 mechanically delinted, 131
 de novo fatty acid synthesis, fatty acid oxidation, fatty liver, 672
 diet composition, dry matter intake, milk yield, 2184
 disease, milk production, lasalocid, 2967
 farm design, simulation, robotic milking, 764
 fatty liver, metabolic disorder, disease, 3105
 feed ration, dry matter intake model, milking robot, 2254
 feeding behavior, roughage neutral detergent fiber, corn silage vs. soy hulls, 2230
 feeding space, feeding behavior, 1432
 flaked corn, amino acid, peptide, 413
 forage source, nitrogen, environment, 3480
 nitrogen balance, manure, 3492
 glucose infusion, mammary metabolism, amino acid, 340
 glucose precursor, dietary fat, ketosis, 2122
 gossypol, whole cottonseed, cottonseed meal, 2506
 grain processing, forage particle length, amino acid flow, 2578
 immune response, polyunsaturated fatty acid, 2197
 lactation, nutrition, bovine tuberculosis, 330
 lauric acid, protozoa, milk protein, 1820
 mammary gland, haptoglobin, mastitis, 3778
 meta-analysis, dietary cation-anion difference, acid-base status, 2222
 methionine, gluconeogenesis, hepatic lipidosis, 1071
 microbial protein, fodder beet, potato, 1057
 microbial synthesis, purine derivative, milk, 2211
 milk back-flush, cisternal milk, ultrasonography, 2409
 milk fat depression, starch fermentability, *trans* fatty acids, 3800
 milk production, phosphorus requirement, 139
 monensin, ruminal acidosis, nutrient digestibility, 1840
 monitorization, feeding behavior, 4207
 nitrogen excretion, milk production, grazing, 3451
 OvSynch, reproductive performance, economics, 85
 particle size, functional specific gravity, physically effective neutral detergent fiber, 3912
 physically effective neutral detergent fiber, rumen pH, particle size, 2495
 pregnancy rate, progesterone, Ovsynch, 1024
 propionic acid, glucose, glucose metabolism, 1767
 protein nutrition, diagnostic, milk urea nitrogen, 386
 quantitative trait locus, health, mastitis, 443
 reproduction, timed artificial insemination, estradiol cypionate, 3704
 reproductive performance, phosphorus requirement, 146
 ruminal acidosis, water, choice, 2248

- stall design, kinematics, lying movement, 2042
 supplemental biotin, peripartum performance, metabolite, 2535
 transition, propylene glycol, monensin, 680
 transition diet, subclinical laminitis, 73
 transition period, flavor, 1872
 urea, uterus, reproduction, 2896
 viscera, rumen volume, transition, 961
- dairy farm, phosphorus, dietary management, 4334
 udder health control, capability index, statistical process control, 2459
- dairy foods, gas chromatography-mass spectrometry, sensory analysis, solid-phase microextraction, 4064
- dairy form, disease, body condition score, 3526
 fertility, body condition score, 3534
 random regression, body condition score, 717
- dairy heifer, early lactation, somatic cell count, udder health, 3672
 intravaginal progesterone insert, timed artificial insemination, reproductive performance, 2868
 multilevel, risk factor, somatic cell count, 937
 skeletal growth, body composition, somatotropin, 3869
 somatotropin, rumen-undegradable protein, 3881
 synchronization of ovulation, timed artificial insemination, 2051
- dairy herd, predicting energy balance, herd test data, 593
- Dairy Herd Improvement, milk recording, herd participation, 2743
- dairy product, milk, estrone, acyl-estrone, 2331
- dairy production trait, mixture model, maximum likelihood, quantitative trait locus mapping, 491
- dairy sheep, lamb production, seasonality, Assaf, 3690
- dairy trade, milk equivalent conversion, multiple component analysis, 1934

- visceral organ, lactation, dairy, cow, 2977
- viscosity, film, sodium caseinate, glycerol, 2011
- vitamin A, vitamin E, retained placenta, mastitis, 609
- vitamin C, mastitis, ascorbic acid, 32
- vitamin D₂, crystal structure, β -lactoglobulin, cholesterol, 785
- vitamin E, legume silage, milk oxidation, red clover, 406
- retained placenta, mastitis, vitamin A, 609
- vitamin fortification, modified atmosphere packaging, long-term storage, nonfat dry milk, 2337
- volatile compound composition, deacidified cheese medium, *Kluyveromyces marxianus*, *Debaryomyces hansenii*, 1545
- volatile fatty acids, rumen pH, transition cow, monensin, 4182
- volatile free fatty acids, adjunct culture, 3224
- voluntary waiting period, days open, pregnancy rate, 4327
- W**
- walking activity, fresh cow disorder, pedometer, milk yield, 524
- warm room treatment, free fatty acids, free amino acid, Swiss cheese, 1986
- waste milk, pasteurization, neonatal calf, 2177
- water, choice, dairy cow, ruminal acidosis, 2248
- wet corn distillers grains, lactation, energy metabolism, 1815
- wet corn gluten feed, soybean hull, corn steep liquor, byproduct, 3899
- whey, antihypertensive peptide, angiotensin-converting enzyme, 1967
- Lactococcus lactis*, oxidative stability, 300
- whey protein, angiotensin-I-converting enzyme, hypertension, lactokinin, 3845
- plasmin, plasminogen activator, 2344
- processing technology, 749
- rotavirus, milk fat globule membrane protein, lactoferrin, 4088
- structure analysis, confocal laser scanning microscopy, casein micelle, 1167
- whey protein concentrate, cheese whey, gel strength, caseinomacropptide, 831
- whey protein isolate, carbohydrate, high performance liquid chromatography, glycomacropptide, 174
- white line disease, mechanical strength, biotin, bovine claw, 2874
- whole cottonseed, cottonseed meal, dairy cow, gossypol, 2506
- free fatty acids, milk yield, nutrient digestibility, 665
- whole-farm stochastic budgeting, Monte Carlo simulation, milk production system, economic, 1945
- whole-plant corn silage, chop length, hybrid, intake, 1298
- Y**
- yeast culture, lactating cow, feed efficiency, 4178
- rumen development, calf, 1832
- yield, carbon dioxide, Cheddar, cheese, 3581
- yield performance, clone, embryo splitting, nuclear transfer, 729
- yogurt, rheology, starter culture, gelation, 3153
- storage, sensory properties, texture, 4033
- Z**
- zinc, amino acid degradability, monensin, 2571
- iron, bioavailability, calcium, 3629
- proteinate, bioavailability, cattle, 1085
- Staphylococcus aureus*, mastitis, copper, 976
