

Subject Index of Papers Published in Volume 88 of the *Journal of Dairy Science*

A

- accelerated shelf-life testing, Cheddar whey powder, storage stability, Maillard browning, 1636
- acid tolerance, bile tolerance, cholesterol assimilation, lactobacilli, 55
- acidic condition, astringency, milk whey protein, process whey protein, 2312
- acidosis, environmental sensitivity, reaction norm model, milk fat depression, 1166
- activator protein-1, bovine α_{S1} -casein encoding gene expression, protein binding, 2246
- activity, repeatability, dairy cow, 171
- acute-phase response, steer, subacute ruminal acidosis, ruminal pH, 1399
- adaptive immunity, *Mycobacterium bovis* BCG, calf, neonatal vaccination, 195
- adipose tissue, metabolic regulation, lactation, chromium, 2498
- adjuvant, vaccine, mastitis, 534
- administration route, comparative efficacy, mastitis, antibiotic treatment, 93
- adsorption, oil-water interface, whipped emulsion, milk and egg protein, 30
- aerobic stability, balage, orchardgrass, round-bale silage, 1815
- corn silage, *Lactobacillus buchneri*, 2130
- aflatoxin, dairy sheep, carry-over, milk, 3063
- age at first calving interval, heat-stress resistance, breed comparison, 790
- age-related macular degeneration, fermented, dairy, 1661
- aggregation, κ -casein, caseinomacropptide, molecular weight, 4228
- albumin, mastitis, mammary gland, lipopolysaccharide, 569
- alfalfa, sucrose, fatty acid, biohydrogenation, 4007
- alkylphenol conjugate, ruminant milk, 7
- allyl mercaptan, rumen fermentation, garlic oil, diallyl disulfide, 4393
- Alxa bactrian camel, colostrum, milk, chemical composition, 3402
- amino acid, methionine, rumen degradability, 223
- disappearance, dry matter, crude protein, 1807
- inhibition, antagonism, rumen bacteria, 2601
- amino acid flow, whole cottonseed, free fatty acid, ruminal fermentation, 690
- aminopeptidase N, peptide, mammary gland, 2055
- ammonia emission, milk urea, rumen-degradable protein balance, 1099
- bedding material, cattle, urine, 4304
- dietary manipulation, crude protein, tannin, 1765
- amylase, β -hydroxybutyrate, transition dairy cow, 4405
- anestrus, dairy cattle, progesterone, estradiol benzoate, 2388
- angiotensin-converting enzyme-inhibitory activity, caprine kefir, simulated gastrointestinal digestion, mass spectrometry, 3480
- animal health, veal calf, probiotic, growth performance, 2154
- animal threshold model, mastitis, lactation model, test-day model, 2260
- animal welfare, biomechanics, cattle lameness, claw disorder, 615
- auditing, certification, welfare standard, 1595
- anovulation, dairy cow, multiple ovulation, milk production, 2783
- antagonism, rumen bacteria, amino acid, inhibition, 2601
- antibacterial peptide, Italian cheese, 2348
- antibiotic, hydrogen peroxide, milk, penicillin, 466
- antibiotic treatment, administration route, comparative efficacy, mastitis, 93
- antibiotic use, dairy herd, 2991
- anticoagulant, NEFA and BHBA concentration, dairy cow, storage and temperature stability, 3139
- antimicrobial, food animal production, herd health and medicine, dairy calf, 2166
- antimicrobial resistance, plasmid, bacteria, dairy soil, 1391
- genetic diversity, *Staphylococcus aureus*, bovine mastitis, 3211
- antimicrobial susceptibility, goat, coagulase-negative staphylococci, somatic cell count, 1694
- goat, *Staphylococcus aureus*, mastitis, 3500
- β -lactamase, coagulase gene typing, *Staphylococcus aureus*, 3149
- antioxidant, light-induced flavor, lipid oxidation, milk, 872
- light-oxidized flavor, lipid oxidation, milk, 881
- reactive oxygen species, mastitis, inflammation, 4295
- antioxidative, reductase, lactobacilli, 1352
- apoptosis, gossypol, embryo, 922
- artificial insemination, pregnancy rate, milk production, natural service, 948

- semen extender, semen thawing, sperm cryopreservation, 3868
- Asiago mountain cheese, solid-phase microextraction, terpene, sesquiterpene, 3426
- associative effect, cottonseed hull, soyhull, fiber digestibility, 1015
- astringency, milk whey protein, process whey protein, acidic condition, 2312
- auditing, certification, welfare standard, animal welfare, 1595
- automatic cluster remover, milk yield, machine-on time, body weight, 148
- automatic milking, individual management, mixed distribution model, feeding pattern, 71
- blood metabolite, cortisol, welfare, 3542
- dairy cow, fat globule, lipolysis, 3519
- feeding pattern, individual management, milking frequency, 3913
- grazing, water supply, milk production, 1711
- teat cleaning, effectiveness of teat cleaning, technical success of teat cleaning, 3354
- autoregressive covariance, milk yield, test day, 2632
- genetic evaluation, milk yield, test day, 3346
- availability, digestibility, lysine, milk, 40
- average daily gain, first-lactation production, prepubertal growth, 3860
- Ayrshire, type trait, survival, Jersey, 1552
- Ayrshire conformation, Bayesian multiple trait across-country evaluation, prior, predictive ability, 3290
- B**
- B vitamin, ruminal destruction, intestinal absorption, dairy cow, 2043
- bacteria, dairy soil, antimicrobial resistance, plasmid, 1391
- bacterial adhesion, *Escherichia coli*, probiotic, caseinoglycomacropeptide, 3455
- bacterial contamination, storage, preservative, colostrum, 2571
- balage, orchardgrass, round-bale silage, aerobic stability, 1815
- barrier layer, porosity, cheese microstructure, brine, 2329
- Bayesian method, mastitis, mixture model, somatic cell score, 2652
- clinical mastitis, dairy cattle, genetic correlation, 1509
- Bayesian multiple trait across-country evaluation, prior, predictive ability, Ayrshire conformation, 3290
- Bayesian network, test evaluation, paratuberculosis, ELISA, 3923
- Bayesian statistic, Ovsynch, dairy cattle, meta-analysis, 2754
- bedding, dairy, sand, recycled, 4317
- bedding material, cattle, urine, ammonia emission, 4304
- beef cattle, calcium, vitamin D, 1364
- behavior, calf, dehorning, pain, 1454
- cubicle, housing, welfare, 2730
- sand bedding, cow comfort, freestall, 2381
- benzaldehyde, flavor degradation, dairy, thermal processing, 1
- bermudagrass, silage, nutritive value, fibrolytic enzyme, 994
- bicarbonate, extruded soybean, goat, milk fatty acid, 757
- bidimensional-dissimilarity rating, odor profile, microbial consortium, cheese model, 1671
- bile tolerance, cholesterol assimilation, lactobacilli, acid tolerance, 55
- biliary lipid, rat, goat and cow milk, dietary fat, 1024
- bioavailability, process cheese, vitamin D, elderly, 2295
- dairy cow, methionine, methionine hydroxy analog ester, 3640
- BioChlor, Fermenten, continuous-culture fermentation, rumen microbial protein production, 2524
- biohydrogenation, conjugated linolenic acid, iso-rumelnic acid, milk fat, 3231
- alfalfa, sucrose, fatty acid, 4007
- oleic acid, pH, dilution rate, 4334
- bioingredient, rheology, yogurt, exopolysaccharide, 4146
- biomechanics, cattle lameness, claw disorder, animal welfare, 615
- birth date, red deer, lactation, milk composition, 154
- bitterness, hydrophobic peptide, secondary proteolysis, Ragusano cheese, 1288
- bivariate threshold model, female fertility, genetic parameter, model comparison, 2190
- blood, β -hydroxybutyrate, ketosis, milk, 2004
- milk, packed cell volume, freezing point, 3174
- blood metabolite, cortisol, welfare, automatic milking, 3542
- lactation stage, monensin, variation within 24 h, 3595
- body composition, lactating dairy cow, prediction, urea space, 2476
- body condition score, lymphocyte function, periparturient cow, 2010
- type trait, random regression, 3663
- body fatness, lipid mobilization, leptin, dairy cow, 1127
- body weight, automatic cluster remover, milk yield, machine-on time, 148
- milk production, pasture, heifer, 3363
- urinary nitrogen, milk urea, 580
- bovine, fatty liver, energy metabolism, 100
- growth hormone, lactation, mammary gland, 2806

- heifer, insulin-like growth factor, mammary gland, 2771
 laminitis, oligofructose, histopathology, 2774
 saposin-like, lymphocyte, 1378
 bovine α_{S1} -casein encoding gene expression, protein binding, activator protein-1, 2246
 bovine herpesvirus-4, milk, serum, pasteurization, 3079
 bovine mastitis, antimicrobial resistance, genetic diversity, *Staphylococcus aureus*, 3211
 bovine milk, MUC1, MUCX, carbohydrate structure, 4288
 bovine milk fat globule membrane, milk anticancer protein, phospholipid, cholesterolemia, 2289
 bovine somatotropin, receptor, uterus, gene, 543
 gluconeogenesis, calf, glucocorticoid, 2107
 breed comparison, age at first calving interval, heat-stress resistance, 790
 breeding objective, restricted index, sustainability, dairy cattle, 1882
 breeding scheme, tropics, crossbreeding, dairy cattle, 1582
 breeding value curve, dairy cow, cubic spline, genetic effect, 1225
 brine, barrier layer, porosity, cheese microstructure, 2329
 brown midrib, starch digestibility, endosperm, 1413
 feeding behavior, endosperm, 1425
 microbial efficiency, endosperm, 1434
 bulk tank milk, somatic cell count, mastitis, milking, 969
 minimum inhibitory concentration, cluster pattern, environmental bacteria, 3710
 bulk tank somatic cell count, mastitis prevalence, statistical process control, 3944
 bull evaluation, genetics, Interbull, international evaluation, 3679
 bull ranking, international dairy, selection index, 1255
 butter, cheese, sensory, conjugated linoleic acid, 2923
 butterfat, isomerization, rumenic acid, conjugated linoleic acid, 1631
 buttermilk, *Helicobacter pylori*, exfoliation, glycopoly-peptide, 49
- C**
- Ca²⁺-ATPase, milk fever, milk fat globule membrane, mammary gland, 1741
 calcium, vitamin D, beef cattle, 1364
 colloidal calcium phosphate, cheese functionality, casein interaction, 3798
 structure, nonfat Mozzarella, direct acidification, 3754
 calcium lactate, crystal, Cheddar cheese, 3737
 cheese, 4157
 calcium lactate crystal, Cheddar cheese, lactic acid, lactose, 2302
 Cheddar cheese, *Lactobacillus curvatus*, gas flushing, 3773
 calcium soap, olive oil, dairy ewe, reticular groove, 741
 calf, neonatal vaccination, adaptive immunity, *Mycobacterium bovis* BCG, 195
 defaunation, rumen, fermentation, 2027
 dehorning, pain, behavior, 1454
 fat, milk replacer, performance, 3575
 genetic selection, milk yield, growth hormone, 1723
 glucocorticoid, bovine somatotropin, gluconeogenesis, 2107
 growth, carcass composition, heifer, 585
 growth performance, metabolism, endocrinology, 2579
 immune function, nutrition, 2718
 immunity, mannan oligosaccharide, periparturient, 766
 molasses, rumen development, 411
 nutrition, heifer, mammary development, 595
 retinol, triglyceride, whey protein isolate, 653
 rumen, development, papilla, 324
 calf heifer management, multiple imputation, longitudinal data analysis, 2828
 calving difficulty, compliance, conception, synchronized estrus, 399
 calving ease, crossbred, genetic evaluation, purebred, 1529
 Canadian dairy breed, survival analysis, functional herd life, 368
 candidate gene, quantitative trait loci, intragenic haplotype, dairy cow, 1208
 Canola meal, rumen-undegradable protein, lactating dairy cow, lignosulfonate, 238
 Canola oil, centrifugation, fractionation, milk fat, 1955
 Canola seed, fatty acid, conjugated linoleic acid, dairy cow, 3084
 caprine kefir, simulated gastrointestinal digestion, mass spectrometry, angiotensin-converting enzyme-inhibitory activity, 3480
 caprine milk cheese, frozen storage, proteolysis, rheology, 1966
 caprylic acid, mastitis, monocaprylin, 3488
 carbohydrate, chromium, periparturient cow, 255
 carbohydrate structure, bovine milk, MUC1, MUCX, 4288
 carbon dioxide, raw milk, microbiology, shelf-life, 3130
 carcass composition, heifer, calf, growth, 585
 carnitine palmitoyltransferase I, liver, ketosis, lipid metabolism, 3851

- carprofen, *Escherichia coli* mastitis, moderate inflammation, primiparous cow, 2361
- Carreau-Yasuda model, concentrated skim milk, rheology, ultrafiltration, 3784
- carry-over, milk, aflatoxin, dairy sheep, 3063
- α_{S1} -casein, casein micelle, circular dichroism, molecular modeling, 2318
- β -casein, genetic polymorphism, single-strand conformation polymorphism, goat, 1878
- κ -casein, caseinomacropptide, molecular weight, aggregation, 4228
- κ -casein polymorphism, single-strand conformation polymorphism, nomenclature, goat, 1490
- casein, polymorphism, haplotype, goat, 1561
- cheese, *Pseudomonas fluorescens*, protease, 3392
 - colloidal calcium phosphate, emulsifying salt, 3070
 - whey protein, cow's milk, food allergy, 1654
- casein hydrolysis, *Cynara cardunculus*, reverse phase-HPLC, rennet, 1947
- casein interaction, calcium, colloidal calcium phosphate, cheese functionality, 3798
- casein micelle, circular dichroism, molecular modeling, α_{S1} -casein, 2318
- caseinoglycomacropptide, bacterial adhesion, *Escherichia coli*, probiotic, 3455
- caseinomacropptide, molecular weight, aggregation, κ -casein, 4228
- cattle, prestimulation, oxytocin, milk flow, 137
- phosphorus, phytate, phytase, 2893
 - risk assessment, *Cryptosporidium*, watershed, 3932
 - urine, ammonia emission, bedding material, 4304
- cattle lameness, claw disorder, animal welfare, biomechanics, 615
- ceftiofur, therapy, clinical mastitis, 3496
- centrifugation, fractionation, milk fat, Canola oil, 1955
- certification, welfare standard, animal welfare, auditing, 1595
- characterization, exopolysaccharide, screening, isolation, 843
- Cheddar, exopolysaccharide, cryo-scanning electron microscopy, microstructure, 4214
- viscoelastic properties, reduced-fat cheese, 4221
- Cheddar cheese, process cheese, Schreiber test, cheese meltability, 857
- calcium lactate, crystal, 3737
 - lactic acid, lactose, calcium lactate crystal, 2302
 - Lactobacillus curvatus*, gas flushing, calcium lactate crystal, 3773
 - proteolysis, texture, chymosin, 3101
- Cheddar whey powder, storage stability, Maillard browning, accelerated shelf-life testing, 1636
- cheese, conjugated linoleic acid, sheep, milk, 1311
- calcium lactate, crystal, 4157
 - consumer, conjugated linoleic acid, milk, 1837
 - fatty acid, conjugated linoleic acid, sheep milk, 3443
 - Pseudomonas fluorescens*, protease, casein, 3392
 - sensory, conjugated linoleic acid, butter, 2923
 - yield, proteolysis, serum protein, 4183
- cheese functionality, casein interaction, calcium, colloidal calcium phosphate, 3798
- cheese meltability, Cheddar cheese, process cheese, Schreiber test, 857
- cheese microstructure, brine, barrier layer, porosity, 2329
- cheese model, bidimensional-dissimilarity rating, odor profile, microbial consortium, 1671
- cheese yield, hard-pressed cheese, ovine, stage of lactation, 1358
- chemical composition, Alxa bactrian camel, colostrum, milk, 3402
- chewing, rumen pH, dairy cow, physically effective NDF, 2117
- chitosan, shelf life, natural antimicrobial substance, Mozzarella cheese, 2683
- cholesterol assimilation, lactobacilli, acid tolerance, bile tolerance, 55
- cholesterolemia, bovine milk fat globule membrane, milk anticancer protein, phospholipid, 2289
- chromium, periparturient cow, carbohydrate, 255
- adipose tissue, metabolic regulation, lactation, 2498
- chymosin, Cheddar cheese, proteolysis, texture, 3101
- cinnamaldehyde, rumen fermentation, garlic oil, 2508
- circular dichroism, molecular modeling, α_{S1} -casein, casein micelle, 2318
- cisternal and alveolar milk, dairy goat, pregnancy, extended lactation, 3894
- claw and foot disorders, genetic parameter, generalized linear mixed model, 3316
- claw disorder, animal welfare, biomechanics, cattle lameness, 615
- claw health, conformation, genetic parameter, 3672
- claw lesion, floor system, digital dermatitis, claw trait, 110
- claw trait, claw lesion, floor system, digital dermatitis, 110
- clinical mastitis, udder health, new infection rate of mastitis, somatic cell count, 86
- ceftiofur, therapy, 3496
 - dairy cattle, genetic correlation, Bayesian method, 1509
 - dairy cattle, random regression model, somatic cell score, 1515
 - linear model, survival analysis, dairy cattle, 797
 - somatic cell score, dairy management, 3700
 - survival analysis, Wiener process, genetic evaluation, 834
- cloned cow, growth, reproduction, lactation performance, 4097

- cluster pattern, environmental bacteria, bulk tank milk, minimum inhibitory concentration, 3710
- coagulase gene typing, *Staphylococcus aureus*, antimicrobial susceptibility, β -lactamase, 3149
- coagulase-negative staphylococci, somatic cell count, antimicrobial susceptibility, goat, 1694
- co-culture, whey protein concentrate, exopolysaccharide, preacidification, 1973
- colloidal calcium phosphate, emulsifying salt, casein, 3070
- cheese functionality, casein interaction, calcium, 3798
- color, immunoglobulin G, goat, colostrum, 1752
- colostrum, immunoglobulin IgG₁, Jersey calf, 296
- bacterial contamination, storage, preservative, 2571
 - color, immunoglobulin G, goat, 1752
 - lyophilized, immunoglobulin G, goat kid, 3650
 - milk, chemical composition, Alxa bactrian camel, 3402
- comfort index, stall use, lameness, 3876
- commercial dairy herd, gene-flow, genotype, cumulative discounted expression, 4426
- comparative efficacy, mastitis, antibiotic treatment, administration route, 93
- compliance, conception, synchronized estrus, calving difficulty, 399
- concentrate, nutrient flow, dairy cow, grass, 1443
- concentrate supplementation, pasture, enteric fermentation, methane, 2836
- concentrated milk, heat stability, ultrasonic velocity, high-resolution ultrasonic spectroscopy, 3121
- concentrated skim milk, rheology, ultrafiltration, Carreau-Yasuda model, 3784
- conception, synchronized estrus, calving difficulty, compliance, 399
- conception rate, detection of estrus, synchronization, timed artificial insemination, 4313
- condensing, process cheese, ultrafiltration, 3037
- conformation, type, progeny testing, genotype by environment interaction, 386
- dairy sheep, mastitis, udder, 2238
 - genetic parameter, claw health, 3672
 - production increase, maturity rate, functional trait, 1540
 - quantitative trait loci, genome scan, dairy, 4111
- conjoint analysis, dairy chain, fluid milk, food safety, 1601
- conjugated linoleic acid, milk flavor, oxidation, vaccenic acid, 489
- butter, cheese, sensory, 2923
 - butterfat, isomerization, rumenic acid, 1631
 - dairy cow, Canola seed, fatty acid, 3084
 - early lactation, milk fat depression, net energy balance, 1078
 - iso-rumelenic acid, milk fat, biohydrogenation, 3231
 - lactating cow, vegetable oil, milk performance, 2037
 - milk, cheese, consumer, 1837
 - milk fat, heat stress, energy balance, 1732
 - genetic selection, dairy cow, 3886
 - milk fat depression, rumen protection, 1685 - rumenic acid, milk fat, functional food, 2714
 - sheep, milk, cheese, 1311
 - sheep milk, cheese, fatty acid, 3443
- consumer, conjugated linoleic acid, milk, cheese, 1837
- continuous lactation, metabolic status, performance, liver, 3530
- continuous-culture fermentation, rumen microbial protein production, BioChlor, Fermenten, 2524
- controlled internal drug-releasing device, dairy heifer, timed artificial insemination, resynchronization, 957
- conventional heating, Nabulsi cheese, microwave, labaneh, 1301
- cooling pond, heat stress, culling, dairy management, 2281
- corn, fermentation, legume silage, proteolysis, 2903
- corn distillers solubles, fat, lactation, 4000
- corn kernel, particle size, corn silage, minimally fragmented starch, 4414
- corn silage, fiber digestibility, milk yield, 244
- kernel processing, theoretical length of cut, 310
 - Lactobacillus buchneri*, aerobic stability, 2130
 - minimally fragmented starch, corn kernel, particle size, 4414
 - particle length, forage:concentrate ratio, milk fatty acid, 2813
- cortisol, welfare, automatic milking, blood metabolite, 3542
- Corynebacterium*, *Corynebacterium bovis*, mastitis, pulsed-field gel electrophoresis, 1705
- Corynebacterium bovis*, mastitis, pulsed-field gel electrophoresis, *Corynebacterium*, 1705
- cottage cheese, psychrotrophic spoilage, *Lactobacillus delbrueckii* ssp. *lactis*, 1335
- cottonseed hull, soyhull, fiber digestibility, associative effect, 1015
- covariance structure, test-day yield, random regression, heterogeneous covariance, 2981
- cow, growth hormone receptor, liver, 1370
- yeast culture, galacto-oligosaccharide, ruminal fermentation, 1404
- cow comfort, freestall, behavior, sand bedding, 2381
- cow's milk, food allergy, casein, whey protein, 1654
- Cox frailty model, culling, dairy heifer, early lactation somatic cell count, 560
- Crescenza cheese, headspace analysis, shelf life, electronic nose, 3044
- crossbred, genetic evaluation, purebred, calving ease, 1529

- restricted maximum likelihood, *Staphylococcus aureus*, peripheral blood mononuclear cell, 2643
- crossbreeding, dairy cattle, breeding scheme, tropics, 1582
- crude protein, tannin, ammonia emission, dietary manipulation, 1765
- amino acid, disappearance, dry matter, 1807
- cryo-scanning electron microscopy, microstructure, Cheddar, exopolysaccharide, 4214
- cryptosporidiosis, diarrhea, halofuginone, neonatal calf, 1801
- Cryptosporidium*, watershed, cattle, risk assessment, 3932
- crystal, Cheddar cheese, calcium lactate, 3737
- cheese, calcium lactate, 4157
- cubic spline, genetic effect, breeding value curve, dairy cow, 1225
- cubicle, housing, welfare, behavior, 2730
- culling, dairy heifer, early lactation somatic cell count, Cox frailty model, 560
- dairy management, cooling pond, heat stress, 2281
- somatic cell count, survival analysis, longevity, 804
- cultivar, intake, milk yield, perennial ryegrass, 3240
- culture, Petrifilm, microbiology, mastitis, 3000
- cumulative discounted expression, commercial dairy herd, gene-flow, genotype, 4426
- Cynara cardunculus*, reverse phase-HPLC, rennet, casein hydrolysis, 1947
- cytochrome P450, neonatal calf, nuclear receptor, retinoic acid, 3971
- cytokine, *Escherichia coli*, transforming growth factor, mastitis, 1986
- D**
- dairy, thermal processing, benzaldehyde, flavor degradation, 1
- age-related macular degeneration, fermented, 1661
- conformation, quantitative trait loci, genome scan, 4111
- sand, recycled, bedding, 4317
- sperm sexing, in vitro fertilization, 776
- survival analysis, longevity, New Zealand, 2962
- dairy calf, antimicrobial, food animal production, herd health and medicine, 2166
- dairy cattle, milk production trait, quantitative trait locus, variance component, 356
- breeding objective, restricted index, sustainability, 1882
- breeding scheme, tropics, crossbreeding, 1582
- clinical mastitis, linear model, survival analysis, 797
- dairy cattle environment, foodborne pathogen, *Escherichia coli* O157:H7, 4441
- disease, genetic correlation, threshold model, 3273
- energy balance, model function, 2226
- genetic correlation, Bayesian method, clinical mastitis, 1509
- genetic evaluation, marker-assisted selection, quantitative trait loci, 1569
- international genetic evaluation, genetic correlation, data subsetting, 1214
- meta-analysis, Bayesian statistic, Ovsynch, 2754
- milk, odd and branched chain fatty acids, microbial protein, 1031
- progesterone, estradiol benzoate, anestrus, 2388
- random regression model, somatic cell score, clinical mastitis, 1515
- shiga toxin, foodborne pathogen, *Escherichia coli*, 450
- test-day yield, random regression model, 3688
- total body energy content, genetic variation, 2616
- transition, energy density, metabolic status, 4375
- dairy cattle environment, foodborne pathogen, *Escherichia coli* O157:H7, dairy cattle, 4441
- dairy chain, fluid milk, food safety, conjoint analysis, 1601
- dairy cow, photoperiod, dry period, prolactin receptor, 121
- activity, repeatability, 171
- B vitamin, ruminal destruction, intestinal absorption, 2043
- body fatness, lipid mobilization, leptin, 1127
- candidate gene, quantitative trait loci, intragenic haplotype, 1208
- Canola seed, fatty acid, conjugated linoleic acid, 3084
- conjugated linoleic acid, milk fat, genetic selection, 3886
- cubic spline, genetic effect, breeding value curve, 1225
- dietary protein, nitrogen excretion, forage, 3619
- fat globule, lipolysis, automatic milking, 3519
- feed barrier, feeding behavior, 2377
- feed delivery, feeding behavior, 625
- feeding behavior, model, 1848
- fertility trait, genetic parameter, 2199
- flaxseed, protein, milk production, 1755
- frequency of feed delivery, feeding behavior, 3553
- grass, concentrate, nutrient flow, 1443
- grazing behavior, pasture, ruminal pH, 711
- herbage intake, sward cutting, n-alkane, 1827
- infrared thermography, laminitis, lactation stage, 2749
- in situ, milk fatty acid, pelleted cottonseed, 4342
- ketosis, β -hydroxybutyrate, disease monitoring, 2441
- lactation, folic acid, rumen-protected methionine, 660
- vitamin B₁₂, folic acid, 671
- lameness, kinematics, hoof pathology, 3166

- luteinizing hormone, mastitis, estrus, 2422
 mammary cell turnover, milking frequency, diet energy, 975
 manganese, digestion, 2517
 methionine, methionine hydroxy analog ester, bioavailability, 3640
 metritis, transition, feeding behavior, 2843
 microbial marker, ¹⁵N, purine, 4065
 mixed-alfalfa pasture, partial mixed ration, monensin, 644
 milk production, gross efficiency of nitrogen utilization, protein, 2556
 multiple ovulation, milk production, anovulation, 2783
 nitrogen metabolism, microbial protein, rumen-degraded protein, 4045
 nutrient intake, milk yield, milk protein yield, 2860
 phosphorus requirement, phosphorus excretion, fiber source, 2850
 reproductive performance, ovarian activity, 3609
 physically effective NDF, digestion, milk production, 1090
 chewing, rumen pH, 2117
 protein, degradability, model, 282
 ruminal fermentation, intestinal supply of nutrients, 2537
 redox potential, method of measurement, rumen, 277
 ruminal fermentation, nutrient digestion, intestinal supply of nutrients, 2879
 selenium, neutrophil, mastitis, 4366
 storage and temperature stability, anticoagulant, NEFA and BHBA concentration, 3139
 transition period, oxidative status, metabolic status, 2017
 dairy cow cleanliness, tie-stall design, dairy cow injury, 3201
 dairy cow injury, dairy cow cleanliness, tie-stall design, 3201
 dairy efficiency, exogenous proteolytic enzyme, forage:concentrate ratio, digestibility, 2140
 dairy ewe, reticular groove, calcium soap, olive oil, 741
 genetic parameter, lifetime trait, 3265
 dairy feed, survey, Wisconsin, heavy metal, 2911

- udder, conformation, dairy sheep, mastitis, 2238
- udder health, new infection rate of mastitis, somatic cell count, clinical mastitis, 86
- UHT, microwave, sulfhydryl oxidase, flavor, 4172
- UHT milk, packaging, light-oxidation, off-flavor, 499
- ultrafiltration, milk, protein, heat-denaturation, 1941
 Carreau-Yasuda model, concentrated skim milk, rheology, 3784
 condensing, process cheese, 3037
- ultrasonic velocity, high-resolution ultrasonic spectroscopy, concentrated milk, heat stability, 3121
- ultrasound, droplet size distribution, fat content, process control, 1320
- unsaturated fatty acid, gut hormone, dry matter intake, dietary fat, 632
- urea space, body composition, lactating dairy cow, prediction, 2476
- urinary nitrogen, milk urea, body weight, 580
- urine, feces, nitrogen, pectin, 4028
 ammonia emission, bedding material, cattle, 4304
- uterus, gene, bovine somatotropin, receptor, 543
- UV-spectrophotometry, lipid measurement, milk fat, 478

V

vaccenic acid, conjugated linoleic acid, milk flavor, oxidation, 489
 vaccine, mastitis, adjuvant, 534
 variance component, dairy cattle, milk production trait, quantitative trait locus, 356
 variation within 24 h, blood metabolite, lactation stage, monensin, 3595
 veal calf, probiotic, growth performance, animal health, 2154
 vegetable oil, milk performance, conjugated linoleic acid, lactating cow, 2037
 veterinary laboratory, mastitis, proficiency testing, interlaboratory comparison, 553
 viscoelastic properties, reduced-fat cheese, Cheddar, exopolysaccharide, 4221
 vitamin A, neonatal calf, intestine, lactoferrin, 1050
 lactoferrin, metabolism, neonatal calf, 1062
 vitamin B₁₂, folic acid, dairy cow, lactation, 671
 vitamin C, fortified milk, storage, packaging, 891
 beef cattle, calcium, 1364
 vitamin D, elderly, bioavailability, process cheese, 2295
 volatile compound, microbial community, raw milk, sensory analysis, 3840

W

wastewater, radiofrequency power, disinfection, 4120
 water, long particle, sorting, 1043
 water supply, milk production, automatic milking, grazing, 1711
 watershed, cattle, risk assessment, *Cryptosporidium*, 3932
 welfare, behavior, cubicle, housing, 2730
 automatic milking, blood metabolite, cortisol, 3542
 welfare standard, animal welfare, auditing, certification, 1595
 whey, sensory analysis, headspace analysis, flavor, 2689
 milk cow, progesterone, 4239

whey protein, cow's milk, food allergy, casein, 1654
 whey protein concentrate, exopolysaccharide, preacidification, co-culture, 1973
 whey protein isolate, flavor, 3826
 whey protein isolate, calf, retinol, triglyceride, 653
 flavor, whey protein concentrate, 3826
 Maillard reaction, functional property, phosphorylation, 4137
 whipped emulsion, milk and egg protein, adsorption, oil-water interface, 30
 white cheese, starter, *Lactococcus*, ripening period, 3460
 whole cottonseed, free fatty acid, ruminal fermentation, amino acid flow, 690
 genetically modified, gossypol, nutrient content, 1470
 whole cottonseed meal, iron sulfate, gossypol, 3563
 Wiener process, genetic evaluation, clinical mastitis, survival analysis, 834
 Wisconsin, heavy metal, dairy feed, survey, 2911
 withdrawal time, natural inhibitor, Delvotest SP assay, heat treatment, 908

X

x-ray diffraction, triacylglycerol, polymorphism, differential scanning calorimetry, 511

Y

yeast, ruminal microbial metabolism, *Saccharomyces boulardii*, 2594
 yeast culture, galacto-oligosaccharide, ruminal fermentation, cow, 1404
 yield, proteolysis, serum protein, cheese, 4183
 yield prediction, genotype by environment interaction, regional evaluation, genetic evaluation, 812
 yogurt, exopolysaccharide, bioingredient, rheology, 4146
 yogurt aroma, fermented whey, fermented milk-like beverage, starter culture, 3745
