

NOTICE TO CONTRIBUTORS

Authorship of Original Articles and Reviews.—Space in the JOURNAL is reserved for the publication of original research voluntarily submitted by members of the Association to the JOURNAL and review articles by invitation. In the case of joint authorship, the membership ruling applies to one author only.

Papers that already have appeared in print or that are intended for simultaneous publication elsewhere will not be accepted.

Manuscripts.—Manuscripts should be submitted in double spacing on one side of suitable 8½" x 11" paper. The original copy should be furnished. All illustrative and tabular material should accompany the manuscript.

Except in cases of invited reviews, papers must be limited to 12 printed pages unless previous permission from the editor is obtained. When non-review articles exceed 12 pages, a charge of \$5 per over page is made.

Manuscripts will be published in the order of their receipt. They should be sent to the Editor, P. H. Tracy, Food Technology Department, University of Illinois, Urbana, Illinois. In order to speed publication, one author should be designated to assume the responsibility of checking the galley proof on all papers of multiple authorship. All galley proofs should be returned in the minimum possible time to avoid delay in publication.

Figures.—Original drawings, diagrams and charts should be done in India ink on tracing cloth (or white board) not larger than standard letter size (8½" x 11"). All lettering should be inked in block style and be of such size that the lettering will not be less than ¼ in. in height when the figure is reduced to 4 in. in maximum dimension. Typewritten labeling of axes and axis units is not acceptable. Original drawings should be submitted, rather than photographs of such drawings. When suitable drawings are not furnished, the author will be charged for the preparation of drawings of satisfactory quality by an independent agency.

Photographs.—Photographs for halftone reproduction should be glossy prints free of all imperfections.

Legends.—Legends for figures and photographs should be typed on a sheet separate from the illustrative material and should be made as concise as possible while retaining their descriptive character.

Tabular Material.—Tabular material should be clear, concise and accurate. Often data can be condensed and presented in summarized tabular form. Tables of only one or two lines should be avoided except in most unusual cases. Excessively large or complicated tables are almost impossible to print satisfactorily. Headings should be as concise as possible, yet descriptive in character. Data may be presented either in tabular form or in figures, but the same data must not be presented in both forms. Each table should be placed on a separate sheet and not in the body of the manuscript. The letters *a*, *b*, *c*, etc., should be used for footnote designations. If possible, tables should be so organized that they may be set across the page, rather than the length of the page.

References.—Literature reviews should be limited to only the most pertinent references. Reference lists should be double spaced and arranged alphabetically as to author and by chronological appearance of the journals cited under a given author. Papers by a single author always precede papers by that author and associates. References to multiple authors are arranged in the alphabetical order of the several authors. Give only initials rather than full first names of male authors. Citations in the text should be made by the number in parentheses corresponding to the number in the reference list.

Each reference should contain the following: Reference number, author(s), title of article, name of journal, volume number, first and last page numbers, and year of publication. Titles of all articles should appear in complete untranslated form. Consult recent published articles in the JOURNAL for proper citation. Publications are abbreviated according to the form given in CHEMICAL ABSTRACTS, vol. 45, no. 24, part 2, 1951.

Sample of journal citation: (1) JONES, L. W., AND SMITH, J. D. Effect of Feed on Body of Butter. J. DAIRY SCI., 24: 550-560. 1941.

Sample of book citation: (1) LANDSTEINER, K. *The Specificity of Serological Reactions*. Rev. Ed. Harvard University Press, Cambridge, Mass. 1945.

For Experiment Station publications, the citation should be as follows: (1) COULTER, S. T., AND JENNESS, R. Packing Dry Whole Milk in Inert Gas. Minn. Agr. Expt. Sta. Tech. Bull. 167. 1945.

The more common abbreviations used in the text are: cm., centimeter(s); cc., cubic centimeter(s); g., gram(s); mg., milligram(s); γ , microgram(s); ml., milliliter(s); mm, millimicron(s); C., Centigrade; F., Fahrenheit; lb., pound(s); oz., ounce(s).

Where configurational structures of chemical compounds are used, drawings suitable for reproduction by photoengraving are to be furnished by the author.

In preparing manuscripts, use of first person should be avoided.
