

## The Australian Journal of Dairy Technology

The Journal provides the latest information on developments in dairy research and technology in Australia. The quarterly Journal contains scientific papers as well as news, editorials, reports of Society proceedings and book reviews.

Technical Publications on specialized subjects are issued periodically as supplements. In 1965 two supplements were issued:—

Technical Publication No. 16—Spray Drying of Milk.

Technical Publication No. 17—The Manufacture of Ice Cream.

### SOME ARTICLES PUBLISHED IN 1965

Further Studies on the Internal Structure of the Casein Micelles of Milk, by P. D. Shimmin and R. D. Hill.

Studies on Recombined Sweetened Condensed Milk, by L. L. Muller and F. G. Kieseker.

Investigation into the use of Foaming Detergent Sanitisers, by J. T. Feagan and D. Murnane.

Lipolysis and the Frothing of Milk, by R. A. Buchanan.

Milking Machine Testing, by G. A. Mein and W. G. Whittlestone.

## *Can you afford to buy 1,000 journals, books, reports, and bulletins each year?*

**D  
S  
A**

The cost might well be \$15,000 if you were to purchase all the journals and other publications in the world from which DAIRY SCIENCE ABSTRACTS is prepared. Yet the annual subscription to this monthly review of the world's scientific and technical literature on all aspects of dairying is only \$15.00 for members of the American Dairy Science Association—a good investment by any yardstick! It is prepared monthly at the Commonwealth Bureau of Dairy Science and Technology, Shinfield, Reading, England, and you will find information in it that will help YOU.

*Annual Subscription for A.D.S.A. members if ordered through their Association...\$15.00*

*Members: Send your orders to C. J. Cruse, Post Office Box 327, Monticello, Ill. 61856*
