

## CONTENTS

### JANUARY. No. 1

The Effect of the Hydrogen Ion Concentration on the Churning Time of Cream. E. S. Guthrie and Paul Francis Sharp.....	1
Size of Cow and Efficiency of Milk Production. W. L. Gaines.....	14
Bromcresol Green Paper in the Manufacture of Grain-Curd Casein. E. O. Whittier.....	26
Observations on the Heat Resistance of Some Ropy Milk Organisms. B. W. Hammer and R. V. Hussong.....	27
Variations in the Coagulation and Proteolysis of Milk by <i>Streptococcus lactis</i> . L. A. Harriman and B. W. Hammer.....	40
Variations in the Buffer Value of Herd Milk. Paul D. Watson.....	50
Viability of <i>Lactobacillus acidophilus</i> and <i>Lactobacillus bulgaricus</i> Cultures stored at Various Temperatures. Luther A. Black.....	59
Correlation Between Annual Butter Fat Production and Annual Feed Cost of Dairy Cows under Farm Conditions. C. W. McIntyre.....	73
Some Observations on the Basic Viscosity of Ice Cream Mixes. J. C. Hening.....	84

### MARCH. No. 2

A Test for the Detection of Milk Unstable to Heat. Guy A. Ramsdell, Wm. T. Johnson, Jr., and Fred R. Evans.....	93
Speed of Dasher and Scraper as Affecting the Quality of Ice Cream and Sherbet. E. L. Reichart.....	107
An Interpretation of the Feeding Standards for Growing Dairy Cattle. J. B. Fitch and R. H. Lush.....	116
The Effect of Feeding Menhaden (Fish) Oil on the Secretion of Milk and the Composition of Butter Fat in the Dairy Cow. J. B. Brown and T. S. Sutton.....	125
The Effect of Dilution on the Titratable Acidity of Cows' Milk. H. H. Sommer and Jules Ménos.....	136
Agglutinin, Complement, and Chemical Composition of the Colostrum of the Cow. M. Sato, K. Ogura and H. Ikejima.....	156
Calculating Rations for Dairy Cows. T. E. Woodward.....	173
The Feathering of Evaporated Milk in Hot Coffee. Randall Whitaker.....	177

### MAY. No. 3

Skim milk as a Feed for Dairy Cows. C. H. Eckles and E. N. Shultz.....	189
The Effect of Acidity on <i>Lactobacillus acidophilus</i> Cultures. Luther A. Black and J. C. Harris.....	193
The Number of Daughters Necessary to Prove a Sire. Jay L. Lush.....	209
The Influence of Sweetened, Frozen Cream on the Development of Swell in Ice Cream. Walter V. Price.....	221

<b>Fat Soluble Vitamins. XXXIII. The Determination of Vitamin A and Its Stability in Butter Fat to Ultra Violet Radiations. H. Steenbock and Alice M. Wirick.....</b>	<b>229</b>
<b>The Relation of Certain Plant Processes to Flavor Development in Market Milk. P. H. Tracy and H. A. Ruehe.....</b>	<b>250</b>
<b>Calcium and Phosphorus Metabolism in Dairy Cows. IV. The Assimilation of Calcium Fed as Calcium Gluconate. William A. Turner, Edward A. Kane, Walter S. Hale and Herbert G. Wiseman.....</b>	<b>268</b>
<b>The Germicidal Action of Raw Milk upon an Organism of the Sweet Curdling Type. Harold R. Curran.....</b>	<b>276</b>

## JULY. No. 4

<b>Deficiencies in Rations Devoid of Roughage for Calves. I. The Effect of the Addition of Cod Liver Oil and Alfalfa Ash. S. W. Mead and W. M. Regan.....</b>	<b>283</b>
<b>Length of Calving Interval and Average Milk Yield. W. L. Gaines and J. R. Palfrey.....</b>	<b>294</b>
<b>Dietary Factors Influencing Calcium Assimilation. XIV. The Influence of Mineral Acids and Sugar on the Calcium Metabolism of Milking Cows. E. B. Hart, H. Steenbock and O. L. Kline.....</b>	<b>307</b>
<b>Calcium Assimilation as Indicated by Bone Analysis in Long-Time Experiments. Arthur M. Hartman and Edward B. Meigs.....</b>	<b>322</b>
<b>Properties of Some Acid Caseins. R. W. Bell and S. P. Gould.....</b>	<b>337</b>
<b>Method for Hydrogen Ion Determination of Butter. O. F. Hunziker, W. A. Cordes, and B. H. Nissen.....</b>	<b>347</b>
<b>The Hemoglobin and Total Phosphorus in the Blood of Cows and Bulls. C. M. McCay.....</b>	<b>373</b>

## SEPTEMBER. No. 5

<b>The Contribution of the Dam in Inheritance of Milk and Butterfat. Lynn Copeland.....</b>	<b>379</b>
<b>Uniform Rules for the Herd Test.....</b>	<b>394</b>
<b>The Churn as a Source of Molds in Butter. H. Macy, W. B. Combs and H. B. Morrison, Jr.....</b>	<b>398</b>
<b>Preliminary Studies of Churn Sanitation. H. B. Morrison, Jr., H. Macy and W. B. Combs.....</b>	<b>404</b>
<b>The Solubility of Metals in Milk. I. The Solubility of Copper under Various Conditions. H. T. Gebhardt and H. H. Sommer.....</b>	<b>416</b>
<b>The Relative Antineuritic (Vitamin "B") Potency of Certain Milk Derivatives. G. C. Supplee, O. J. Kahlenberg, G. E. Flanigan and O. D. Dow... </b>	<b>447</b>
<b>Malt Flavor in Raw Milk Produced by Micrococcus. P. H. Tracy and R. J. Ramsey.....</b>	<b>457</b>
<b>A Study on Methods for Determining Numbers of Moulds and Yeasts in Butter. I. The Relation of the pH of the Medium. A. H. White and E. G. Hood.....</b>	<b>463</b>

## NOVEMBER. No. 6

<b>Further Remarks on Data on Bacterial Counts Presented by Brew and Dotterrer and Analyzed by Brew. G. A. Baker.....</b>	<b>477</b>
---	------------

CONTENTS

v

The Influence of Environmental Temperature on the Percentage of Butter Fat in Cow's Milk. H. J. Brooks..... 483

A Study of Methods for Determining Numbers of Moulds and Yeasts in Butter. 2. The Influence of Temperature and Time of Incubation. A. H. White and E. G. Hood..... 494

Effect of Single and Double Homogenization of Cream upon Coagulation by Heat and Rennet and upon Separation of the Fat. B. H. Webb..... 508

The Relation of Feathering and Heat Stability of Cream to Fat Clumping Produced by Homogenization F. J. Doan..... 527

Proceedings of the Twenty-Sixth Annual Meeting of the American Dairy Science Association..... 540

Index..... 551
